

Audited Symbolic Relationship Categories & Retention Summary

Actuator → Sensor Consistency

Ex) MV201 opening
→ FIT201 increases
(S2-R1)

Evaluate whether
an actuator
state is compatible
with its expected
sensor response.

Dynamic Process

Ex) P101 state ↔
LIT101 rolling slope
(S1-R2)

Evaluate whether
the recent
evolution of a sensor
is compatible with a
related process state.

Actuator Coupling

Ex) P205 ↔ P203
state/transition
consistency
(S2-R3B)

Evaluate whether
jointly controlled
components
exhibit expected state
configurations or
transitions.

Sensor ↔ Sensor Consistency

Ex) FIT501 ↔ FIT503
residual consistency
(S5-R3)

Evaluate agreement,
residual
behavior, or lagged
relationships between
related
measurements.
